User Instructions

1. Remove the plug from your desired whisl pod, and insert the pod into the whisl battery. The battery light will flash white when the pod is inserted correctly.

2. Start by taking small breaths; device will light up white as you inhale. Find your rhythm.
3. Pods should be kept sealed until ready for use.

Charging

Please charge soon after receiving the low-battery warning, using the provided USB cable. The light will turn itself off when the device is fully charged.

whisl™

CBD

User Guide

There may be risks with vaping that are not fully known or understood.

Your Starter Kit Includes:

- 3.7V, 260mAh lithium ion battery
- 6" cable Micro-USB to USB-A
- Two Intermission pods

whisl uses recyclable material and electronic components. Contact your local waste management officials for information about disposing batteries in accordance with state and local requirements.

Battery Level

For optimal performance, whisl should be fully charged before first use. When the device is in use, the battery light will glow orange to indicate low battery. If the battery light glows red when charging, the device is too hot/cold, or the wall adapter is incompatible. Please return to room temperature and try again, with a compatible wall adapter.

IMPORTANT SAFEGUARDS

Failure to follow instructions and warnings may result in injury or damage.

- This product should not be used if it appears to be malfunctioning.
- Charging 5V/Max 550mA.
- Working/storage temperature 32 – 113°F.
- Charge device by UL-listed USB power source only. Charging should be done indoors only.
- The whisl battery is only compatible with whisl pods. Not for use with any nicotine or THC products.
- Do not re-use, refill or otherwise tamper with the pod reservoir.

SAVE THESE INSTRUCTIONS

WARNINGS

- Battery may ignite, explode, leak or get hot if damaged. Do not drop or puncture battery. Do not expose to excessive heat or immerse in liquids.
- Dispose of batteries properly.
- Vaporizer battery can produce heat when in use.
- Keep away from children and pets.

Troubleshooting

If the battery light flashes at inhalation:

- White flash — Protects against use when the device is too hot/cold, or oil is not in contact with the heating element. Please return to room temperature and try again, with the mouthpiece upright.
- Red flash — There may be a defective pod or connection. Clear any debris from pod and battery contacts and try again, ensuring that the pod is fully inserted.

Model #: JN001

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against interference in a residential setting. This equipment generates, uses and can radiate radio frequency energy and, if not used in accordance with the instructions, may cause interference to radio communications. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to increase the separation between the equipment and receiver. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
